

SYSTEMIC LEADERSHIP: Featuring the Systems Thinking RoundTable

Saturdays, To be decided, 3.5 hour sessions start at 10am (CA), 1pm (OH), 6pm (UK)

3-Unit Online Zoom Course, with Ashland University. *Graduate credit will be granted upon completion of all requirements.*

Dr. Susan Gabriele, sgabriele@gemslearning.net. 310-848-7740, www.gemslearning.net. Cost \$400*

Would you like a boost to your classroom or meeting? A satisfying approach for developing important topics or lessons, increasing individual participation and skills, and building community spirit? Join us in a journey to understand how systems thinking can enhance your leadership knowledge and skills. Add a Systems Thinking RoundTable to your classroom, meeting, or tool kit. See the positive results! This course is of value to graduate students, K-12+ educators, managers, academics, and anyone interested in becoming more effective and inclusive. The course's value is even greater during these challenging times. Course readings are provided.

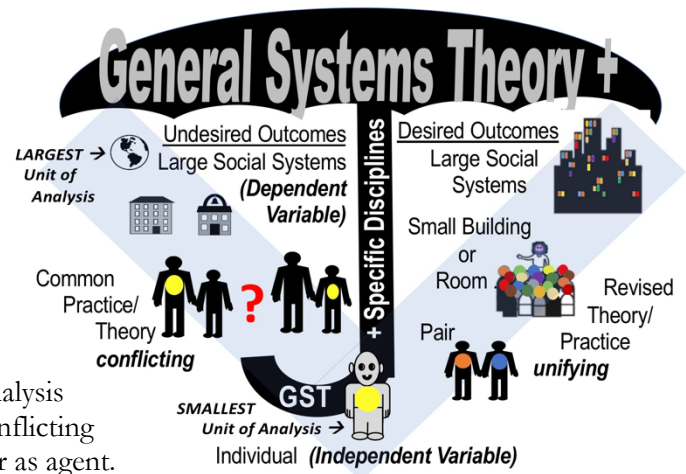

YOU WILL GAIN:

- A satisfying understanding of the usefulness of systems thinking and systems methods
- The *Systems Thinking RoundTable* and other user-ready systemic group activities.
- Concepts, tools, and activities to empower you and the people in your classes and meetings

COURSE OVERVIEW (Also in the V Graphic)

Our eight-week journey begins looking at undesired outcomes in very large social systems as the unit of analysis (top left in the V). Going down the V, we uncover conflicting assumptions (?): leader as sole agent (yellow) v. learner as agent.

Boulding's General Systems Theory (GST) provides an explanatory framework (umbrella) to unify conflicting approaches and help us locate root causes within each individual human (the smallest unit of analysis--bottom center).

We return up the right side of the V, ready to update theory and practice. Boulding's GST clarifies that people learn and behave each according to their own unique *abilities* and *willingness* (multiple colors, along the whole right leg of the V). On our way, we spend time at the pair and room levels of analysis. There, we focus on systems approaches for educators, managers, and other leaders. We land at the top with new insights and practices for systemic leadership in small and large social systems.

At each session in the course, we experience the **Systems Thinking RoundTable**, a user-ready adaptable whole group process that provides equal turns to all. RoundTables are proven to enhance learning, performance and satisfaction.

A. In a class or meeting room

B. Online

The Systems Thinking RoundTable

Our journey is informed by key concepts, literature, and evidence from instruction, management, systems theory, systems methods, systems design, and economics. Other fields that enrich this journey include control systems engineering, psychology, adult learning theory, plus examples from large urban schools and workplaces. Clarifying images are offered to allow discussion of details or examples as well as the more grand-level principles with the goals of making sense to a wide diverse audience.

* **Before you enroll** contact Sue with questions and to learn your requirements for professional development credit, salary point credit, and/or Graduate Credit. (There is an additional cost for university graduate credit.)
